ICD-10-CM Casefinding List, 2027
Based on the International Classification of Diseases, ICD-10-CM Tabular List of Diseases and Injuries, FY 2027

NOTE: The list below was developed to help registrars use casefinding more effectively to find the Intraepithelial neoplasia and dysplasia tumors, otherwise known as precursor lesions. <u>These are based on reportability for SEER. If your standard setter is not SEER, check with your standard setter to determine what is reportable.</u>

For the non-D ICD-10-CM codes, there are potentially other diagnoses, which are not reportable, included in that code. Make sure to review the pathology report carefully to confirm there is a reportable diagnoses.

Only Grade 2, Grade 3, and High Grade lesions are reportable. Grade 1 and low grade lesions are not reportable, and those terms are not included here. Those terms can be found in ICD-O-3.2.
